# The amssymb package

### American Mathematical Society

Version 3.01, 2013/01/14

#### 1 Introduction

This file defines all the symbols found in the AMS symbol fonts msam and msbm.

## 2 The Implementation

First provide package identification.

- 1 \NeedsTeXFormat{LaTeX2e}% LaTeX 2.09 can't be used (nor non-LaTeX)
- 2 [1994/12/01]% LaTeX date must be December 1994 or later
- 3 \ProvidesPackage{amssymb}[2013/01/14 v3.01 AMS font symbols]

See the amsforts package documentation for a discussion of the obsolescence of the psamforts option.

- 4 \DeclareOption{psamsfonts}{\PassOptionsToPackage{psamsfonts}} Process options.
- 5 \ProcessOptions\relax

We call the amsforts package to do the font setup that we need.

6 \RequirePackage{amsfonts}[1995/01/01]

```
7 \@ifpackageloaded{stix}{%
```

```
PackageWarningNoLine{amssymb}{The 'amssymb' package is redundant when you are using the 'stix' package, so I'm not going to load amssymb}

10 \endinput

11 }{}
```

We undefine a few symbols that were perhaps defined by the amsfonts package (q.v.); otherwise \DeclareMathSymbol would issue some error messages. (All these symbol names are \let to the first defined; that way, if the underlying code changes, only one change needs to be made here.)

- 12 \let\square\relax \let\rightsquigarrow\square \let\lozenge\square
- 13 \let\vartriangleright\square \let\vartriangleleft\square
- 14  $\left| \text{14}\right|$

Change the \catcode of the double-quote character to ensure that it is not active (which at one time was a problem when something like german.sty was used). This means that \let statements must be made global.

15 \begingroup \catcode \"=12

Now we define the complete set of standard symbol names for the msam and msbm fonts. Redefinitions of symbols or commands which can't be defined via \DeclareMathSymbol are already done in the amsfonts package (for example, \yen, \widehat).

```
 16 \end{align*} 16 \end{align*} 16 \end{align*} 17 \end{align*} 18 \end{align*} 18 \end{align*} 19 \end{align*} 19 \end{align*} 19 \end{align*} 19 \end{align*} 19 \end{align*} 19 \end{align*} 190 \end{align*
```

2
